

## Chamber Books Project

### Task 5: What role did money play in securing the reign of Henry VII?

#### **In this self-guided session you will:**

- Use the evidence you have gathered from the Chamber Books database yourself and the views of the historians to build your own argument;
- Synthesise (bring together) large amounts of primary and secondary material to make a coherent case;
- Experience taking on the role of the Historian yourself and reflect on the skills you have learnt.

**Review: How important was money in securing Henry VII's reign?**

What role did money play in keeping Henry's reign secure? (Remember to refer to your evidence!)

Did his spending change over time? Why do you think this was/ was not the case? What can this tell us?

<p>Does your research confirm that Henry was an avaricious (money-grasping) King? Or is this reputation unfair?</p>	
<p>What have you learnt about how Historians carry out their research and make their argument?</p>	
<p>What challenges did you encounter when taking on the role of the Historian and how did you overcome these?</p>
